Summary

My name is Jonathan, I'm a up and coming datascientist with a background in game development and mathmatics. To perform datascience I have learned Python, C, Javascript, SQL, and HTML, and have gainedfield specific knowledge from personal projects and training with Butler Universities Data Science bootcamp.

With my skills in multiple programming languages , problem solving, and chart visualization I am able to effectively do data analysis and show results to a large audience. I'd love if you had a look at some of my work displayed in my portfolio!

Experience

Education

Sep 2016 - Dec 2019	**Core 40 Highschool Diploma** Lawrence North Highschool
Aug 2020 - Present	**Computer Science** Ivy Tech Community College Currently working on getting a bachelors in computer science, planning on transfering to IUPUI after getting some basic classes out of the way.
